

### Application

The Tie Wire is used to join the conductor to the insulator. It can be applied over the conductor or over the armour rods.

| Size      | Total Diameter | Weight  | Rated Strength |
|-----------|----------------|---------|----------------|
| AWG ó MCM | mm             | kg / km | kg             |
| 6         | 4.11           | 36      | 91             |
| 4         | 5.18           | 57      | 145            |
| 2         | 6.55           | 91      | 235            |
