

# ADAPTA

## SURFACE-MOUNTED FLUORESCENT

## INTERIOR

The Adapta is a versatile marine luminaire constructed from white painted aluminium with an opal polycarbonate diffuser. It is available as a basic luminaire or with an on/off 2 pole switch and/or a Euro Schuko 2-pin 16A socket outlet(no fuse).

The Adapta is easy to install with a range of mounting accessories to choose from i.e. wire suspension, chain suspension and edge connectors for 45° and 90° mounting. In addition to these there is the option of in-line connectors which allow a number of Adaptas to be built into an integrated luminaire system. Perforated shields, which eliminate glare, are available for basic models only.

The Adapta range is suitable for a wide range of T8 and compact fluorescent lamps.

**APPLICATIONS:** Suitable for accommodation areas, berths, shower rooms and bathrooms

### STANDARD SPECIFICATION

|                     |   |
|---------------------|---|
| Ingress Protection: | <b>IP44 to EN 60529</b>   |
| Enclosure:          | <b>White painted aluminium construction c/w opal polycarbonate diffuser</b> |
| Entries:            | <b>Ø20mm knock-outs</b>   |
| Internal Wiring:    | <b>Stranded, heat resistant wiring to 105 °C max</b>                        |
| Termination:        | <b>3 core 2.5mm<sup>2</sup> max conductors</b>                              |
| Mounting:           | <b>Mounted directly to wall or ceiling. Installation kit supplied.</b>      |
| Control Gear:       | <b>Switch start copper/iron control gear and PFC capacitor.</b>             |
