# Draka Elevator Products - who we are

## a Complete Source for Elevator Products and Information

### Who we are

**Draka Elevator Products, Inc.** is dedicated to the design, manufacture and distribution of elevator and escalator cable and components. As part of Dutch cable giant Draka N.V., Draka EP's sister companies include Draka Comteq (makers of coaxial, twisted pair and fiber optic communication cables), BIW Cable Systems and Tamaqua Cable Products (power and control for heavy industry and transportation, and custom cables for a wide range of commercial and military customers). This expanding group of companies enables us to draw on a **wide range of cabling experience** to meet the ever-changing demands of the vertical transportation industry.

Draka EP's plants in the **United States as well as Germany, China, the Czech Republic, India and Spain** fabricate cables and cable assemblies for use the world over. Together, these facilities employ hundreds of people dedicated to the design and production of hoistway products for a demanding elevator world.

In order to make sure Draka EP products arrive at your worksite in a timely fashion, our **US and Canadian distribution centers** organize, package and load hundreds of orders daily. Our global distribution force (which includes partners in Africa, Australia, China, France, Japan, Germany, the Middle East, The Netherlands, Southeast Asia and the United Kingdom) makes sure that our products are available anywhere in the world.

Draka EP also offers some very **special services that speed installation**. Connectorized traveling and hoistway cable literally makes installation a 'snap.' Stripping Whisper-Flex® compensating cable at one end is another service requested by customers that saves time and money during installation.

Another convenient time and money-saving service we offer is matching our cables with electrical and mechanical components - even hand tools, should you request them - and packaging them together into **convenient installation kits**. This way, all of the cable and components needed for a complete, safe installation arrive on site according to your schedule.

Ordering Draka EP products is made simple by our family of customer service representatives who work extended hours (6 am - 8 pm ET) to answer your questions and take your orders. **Experienced application engineers** also provide telephone and on-site installation support for especially challenging jobs.

Draka EP cables are made to the **highest quality standards**. They are designed to meet fire and safety requirements of the NEC, CEC, UL and CSA. The quality system at the manufacturing facility in Rocky Mount, NC, is ISO-9001 certified.

**Rocky Mount, NC Manufacturing Facility**  
This 150,000 sq. ft. plant is where Super-Flex®, Super-Duct®, Whisper-Flex®, flat traveling cables and trough are produced 24 hours/day.

**Distribution Facilities**  
in California, Illinois, Mississippi, North Carolina, metropolitan NYC, Texas and Ontario (Canada) provide prompt service to all of North America.

**Advanced Production and Processes**  
Cutting-edge equipment such as this digitally-controlled cabler permits Draka EP to manufacture to tight tolerances while enabling production to keep up with increasing demand.

**Extensive Sales and Engineering Support**  
An early-morning call to the 1-877-DRAKA-EP results in fast response to a customer's question.

**Decades of Design Experience**  
Advanced CAD workstations aid in transferring design concepts into manufacturing reality.

**Services that Speed Installation**  
Kits and connectorization are services we offer to customers worldwide.

# Draka Elevator Products - what we do

## Design and Manufacture Quality, Safety and Efficiency

### What we do

Draka EP engineers, manufactures, packages and distributes a broad range of elevator and escalator products that meet the global demand for **high-performing, durable and safe** elevator cable and components. Each Draka EP product meets the applicable standard for its intended usage; NEC, CEC, UL, CSA, the US Department of Labor/Mine Safety or the Pennsylvania Bureau of Deep Mine Safety.

### Specialty Products

Along with the items listed in this catalog, Draka EP can also manufacture products that meet your specific applications:

**Special constructions** - cables with custom configurations of power conductors, shielded twisted pair communication cables, coaxial CCTV video or fiber optic sub-units are available. Minimum quantities may apply. Contact Draka EP for details.

**Halogen-free cables** - for demanding fire-safety requirements, Draka EP can manufacture Super-Flex® traveling cable with halogen-free compositions. Call us for pricing and delivery.

**Installation kits** - Draka EP can assemble all the items needed to install any of our cables in one neat shipment. Cable, hanging hardware, grips, conduit, nuts, bolts, tools, even electrical tape arrive on site in one easily stored and inventoried package. Increase your on-site efficiency with Draka EP installation kits.

**Connectorization** - Many Draka EP hoistway and traveling cables can be connectorized for fast and easy installation. Call for details and pricing.

### Customer Service

Draka EP has a complete and **dedicated customer service staff** located in Rocky Mount, NC. They can be reached by calling toll free 1-877-372-5237 (877-DRAKA EP) (+1-252-984-5100 outside the US and Canada) 6 am - 8 pm ET for product information, ordering and pricing.

### Engineering and Product Support

Should you need an answer on product application, installation or capability, call our **Draka EP AnswerLine** at 1-877-372-5237 (+1-252-984-5100 outside the US and Canada) from 6 am - 8 pm ET. If you need more of a 'hands-on' response (such as training, troubleshooting or on-site evaluation), Draka EP application engineers are available to travel to your locations and assist you in every way possible.

### Draka EP Installation Guides

In order to help you in the safe and efficient installation of our products, Draka Elevator Products has an experienced staff of application engineers able to assist you with any questions you may have. We also offer a series of easy-to-follow **installation guides**. Contact us for details.

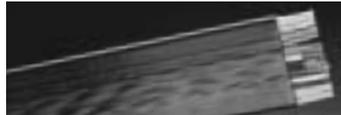

### OEM and Replacement Products

Over 30,000 mechanical, electrical and hydraulic parts and components.

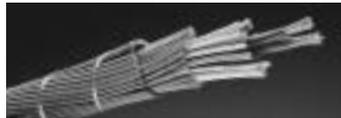

### Super-Flex® Round Traveling Cable

The most popular traveling cable in the world.

### Flat Traveling Cable

A durable and supple flat cable with superior performance characteristics.

### Super-Duct® Hoistway Cables

Unparalleled for their safety and performance.

Motion Control Engineering's SmarTRAQ™ door operator upgrade kit offers 'limitless closed loop technology' to convert popular door operators to true closed loop operation with distance/velocity feedback while compensating for varied door mass, wind loads and system friction. Their 'limitless' design dramatically reduces installation time, maintenance and problems associated with mechanical limit adjustment. They also permit you to keep the existing door operator. The system is A17.1, CSA-B44.1 compliant.

<b>14/3-18/5 SEOW</b>	<b>Cut-to-length cable, for GFCI versions</b>	specify	none		

**PEND-5** series pendant stations are made of rugged high-impact plastic for both durability and electrical safety. Keyed lockout and two-handed operation further increase their safe usage. Options include a 15' • 4.6 meter pigtail; GFCI (Ground Fault Circuit Interrupter) on the pigtail; connectorized pigtails; and modular cable extensions of either 15' • 4.6 meters or 50' • 15.2 meters.

### Top Of Car Inspection (TOCI) Stations

Part Number	Description	
<b>TOCI-L</b>	<b>Top of car inspection box, with GFCI receptacle and light fixture/cage</b>	 <p><b>TOCI-LFA</b></p>
<b>TOCI-LF</b>	<b>Top of car inspection box, with GFCI receptacle, light fixture/cage and fire service light/buzzer indicators</b>	
<b>TOCI-LA</b>	<b>Top of car inspection box, with GFCI receptacle, light fixture/cage and audible 6-28 VDC alarm</b>	
<b>TOCI-LFA</b>	<b>Top of car inspection box, with GFCI receptacle, light fixture/cage, fire service light/buzzer indicators and audible 6-28 VDC alarm</b>	

**TOCI stations** house large, easy-to-read UP, DOWN, COMMON and STOP controls as well as a normal/inspection switch, GFCI receptacle and light fixture/cage in a bright yellow metal enclosure. They are available in four versions - with lamp fixture, lamp/fire service, lamp/alarm and lamp/fire service/alarm. NOTE: All stations come unwired; some field assembly required. Light bulb not included.

### Stop Switches (UL listed, CSA certified)

Part Number	Description	Quantity
<b>EN418-A</b>	Locking Stop Switch	1

**EN418-A** stop switches are UL/CSA approved and use a push-pull action for sure, safe operation. A four-prong guard helps prevent accidental engagement of the switch. Large diagrams printed on the switch show clearly which are the RUN and STOP positions, while indicator windows on the button show 'green for go' when the switch is in the ON position and 'red for stop' when in the STOP position.

Part Number	Pressure Range psi • bars	Flow Rate Range GpM • LpM	Operating Temp F • C	Features	Component Specifications
<b>UV-5AT</b>	90/800 • 6.2/55.2	10/200 • 38/760	80°/150° • 27°/65°	Full temperature compensation	<b>Gage Ports</b> Ram (jack) and pump gage ports are 1/8" NPT and are provided on top of the valve.  <b>Recommended oils</b> A good brand of 32 grade turbine oil with a viscosity of 150 SSU at 100° F (38°C). Other compatible oils are 46 grade and biodegradable (vegetable) oil.  <b>Line Connection UV-5</b> Factory standard for each of the three valve ports is 2" NPT. Optional 2" victaulic connections are also available for all three valve ports.  <b>Line Connection UV-7</b> Factory standard for each of the three valve ports is 2.5" NPT.  <b>CSA-B44/UL Approved Solenoid Coils for UV-5</b> 110 VAC, 110 VAC/12 VDC (dual voltage), 208 VAC, 220 VAC/110 VDC (dual voltage), 440 VAC/220 VDC (dual voltage). For other coil options, please contact EECO.  <b>CSA-B44/UL Approved Solenoid Coils for UV-7</b> 110 VAC, 208 VAC, 220 VAC, 440 VAC, 110 VDC, 220 VDC. For other coil options, please contact EECO.
<b>UV-5ATC</b>	90/800 • 6.2/55.2	10/200 • 38/760	80°/150° • 27°/65°	Full temperature and pressure compensation	
<b>UV-7B</b>	50/500 • 3.2/38	75/375 • 284/1420	80°/150° • 27°/65°	Low pressure/high flow rate	
<b>UV-7BC</b>	50/500 • 3.2/38	75/375 • 284/1420	80°/150° • 27°/65°	Low pressure/high flow rate with constant down speed	

**The UV-5AT** hydraulic control valve is equipped with full temperature compensation over its entire operational range (80° to 150°F). Modifications to the valve body as well as improvements to its internal parts have drastically simplified UV-5AT down adjustments as well as making it the quietest valve on the market.

**The UV-5ATC** offers both temperature and pressure compensation, which is built into the redesigned down piston assembly. It maintains constant down speed between no load and full load conditions. No field adjustments are required.

**The UV-7B** hydraulic control valve designed to deliver low pressure/high flow rate performance.

**The UV-7BC** adds full pressure compensation for constant down speed to the UV-7B. The pressure compensation system is built into a redesigned down piston assembly and maintains constant down speed between no load and full load conditions. No field adjustments are required.

These valves feature high temperature Viton seals and a lightweight, heat-treated, high strength aluminum body. All control adjustments are made from the front of the valve. Moving parts are restricted to sliding sealed pistons. The valve has a fully adjustable pressure relief valve.

Optional features include:

- Pressure gage quick disconnect
- 0-1000 psi liquid-filled pressure gage
- Low pressure switch
- Dual voltage down leveling coil for emergency (battery back up) lowering
- Constant down speed (UV-5ATC only)

See page 116 for a quotation/order form to assist you in pricing or ordering the correct valve.

### Oil Cooler and Silencer

Part Number	Description
<b>MEI-10248</b>	<b>Oil cooler</b> , with filter
<b>MEI-19317</b>	<b>Silencer</b> , 220 max. GPM, fits 2" x 2" grooved coupling - 13-1/4" L x 4-5/8" O.D., 28 lbs.
<b>MEI-19319</b>	<b>Silencer</b> , 360 max. GPM, fits 2-1/2" x 3" grooved coupling - 13-1/2" L x 4-5/8" O.D., 28 lbs.

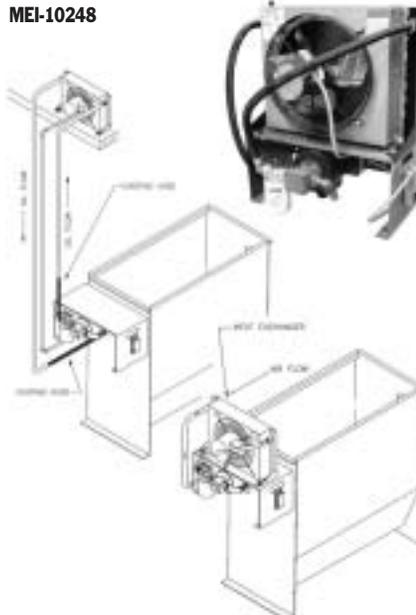

**The MEI Oil Cooler** reduces the oil temperature by nearly 40°F, (depending on site conditions). The cooler also filters the oil which results in smoother stops and starts, improved levelling and extended component life. The oil cooler can be mounted directly or remotely. NOTE: Remote installations should not exceed 110 ft horizontal or 55 ft vertical from tank.

**The MEI Silencer** uses a bladder system with air pressure to reduce excessive noise that may be generated by a hydraulic system.

**MEI-19317**

**MEI-10248**

### Pully Bully Lift/Puller for Submersible Pumps/Motors

Part Number	Description
<b>MEI-17936</b>	<b>Pully bully</b> , submersible pump/motor puller with drip pan/workbench and dolly

**The MEI Pully Bully** is a self-contained lift and mess-free work area for hydraulic pump maintenance. Use the chain hoist to rig and pull the pump/motor out of the power unit, then set the pump/motor on the cart/drip pan and make the necessary repairs. The hoisting frame detaches from the cart (which serves as a workbench/drip pan that collects the excess oil). The Pully Bully complies with ASME B30.17 - 1998.

# Roll Groovers

Manual and powered by Pace

## 1039 Mini-Mite™ Manual Roll Groover

Part Number	Compare to Victaulic®	Description
GRN-1039	VE-26S	Roll groover with hand-crank, including depth gauges

The **Pace 1039 Mini-Mite™ Roll Groover** is designed for use on 1-1/4" to 6" Schedule 40 pipe. The Mini-Mite is self-contained and can be operated with its own multi-function crank or quickly chucked to a Ridgid Model 300 without removing the gearbox. All hex drives on the Mini-Mite are 15/16", so one wrench fits everything. A multi-step depth gauge is included.

## Pace 1041 Roll Groover

Part Number	Compare to Victaulic®	Description
GRN-1041	VE-226M	Roll groover for use with drives, including depth gauges

The **Pace 1041 Roll Groover** is light, portable and easily mounts to a wide range of popular power 3/8" square ratchet drives, including the Victaulic® VPD752, Ridgid® 300/535/1224/1822 and Oster® 310 power drives (not included). Trial grooving depth is easily set with the supplied multi-step feeler gauges. An integral overload device guards against undue load being applied through the ratchet.

<b>LW-CABDISPLA-ML</b>	<b>Cab display</b> , overload shown by flashing and intermittent buzzing	n/a	
<b>LW-CABDISPLA-LPM</b>	<b>Cab display</b> , load shown by progressively lit LEDs, overload by intermittent buzzing	n/a	

Micelect LWDs provide real-time data on cab weight and are accurate to within 0.5%.

**No test weights are required for calibration.**

All units can be connected to one of two optional cab-mounted loading/overload displays.

NOTE: LPM display cannot be used with ILC3 with analog output.

**The ILC3** is for 1:1 roping with a cab weight + capacity of 13,200 lbs. (6000 kg)\*.

The ILC3 has an integrated sensor body/control unit and is available with multiple outputs. It is installed above the cab.

**The LMC** is for 2:1 roping with a cab weight + capacity of 17,600 lbs. (8000 kg)\* OR

4:1 roping with a cab weight and capacity of 35,200 lbs. (16,000 kg)\*.

The LMC is installed in the overhead. It's available with multiple outputs.

A separate control unit is required and is normally mounted in the machine room.

**The WR** attaches to individual ropes supporting a weight + capacity of 2,200 lbs. (1000 kg) per rope. Up to eight WR sensors can be wired into a single separate MWR control unit.

Draka Elevator Products also offers portable LWDs, hydraulic pressure sensors, under-machine bedplate sensors and undercab sensors.

\*Call if your cab weight + capacity is more.

#### ILC3 and LMC devices require the correct clamp size.

Measure the rope spread (outside edge to outside edge) to determine clamp size.

#### For ILC3 units:

Use **LW-ILC3-CLAMP-3** for a spread of 4 1/2" to 6 1/4" • 116 mm to 160 mm.

Use **LW-ILC3-CLAMP-4** for a spread of 6 3/8" to 7 3/8" • 161 mm to 188 mm.

Use **LW-ILC3-CLAMP-5** for a spread of 7 1/2" to 10 1/4" • 189 mm to 263 mm.

#### For LMC units:

Use **LW-LMC-CLAMP-4** for a spread of 4 1/2" to 6 1/4" • 116 mm to 160 mm.

Use **LW-LMC-CLAMP-5** for a spread of 6 3/8" to 7 3/8" • 161 mm to 188 mm.

Use **LW-LMC-CLAMP-6** for a spread of 7 1/2" to 8 7/8" • 189 mm to 225 mm.

Use **LW-LMC-CLAMP-7** for a spread of 9" to 10 1/4" • 226 mm to 263 mm.

Remember to order TWO SPACERS for clamp sizes 3 & 4  
or FOUR SPACERS for clamp sizes 5, 6 & 7.

## Q2500 Seismic Sensor

Part Number	Description	Electrical Information
QTRC-2500-P	Seismic sensor with LCD interface, with meter function	Contacts can operate to 5A @ 240 VAC

The **Draka Q2500 seismic sensor** is a user-friendly system that detects and records vertical and horizontal seismic ground movements. The system stores the peak acceleration (measured in Gs) in each axis for up to 15 seismic events and displays it on the easy-to-understand LCD interface. Alarm levels are preset to meet elevator safety code or can be user-defined. Latching contacts can be remotely reset.

The unit also functions as a meter that displays real-time acceleration and angle of deflection. It meets or exceeds ASCE 25-97, ASME 17.5, and CSA B44.1

## Counterweight Displacement Kit (Ring on a String)

Part Number	Description
<b>CDH-R8</b>	<b>Counterweight displacement kit</b> , mounts to 8 lb. guide rails (order cable [CDH-L500, CDH-L1000 or CDH-L1500] separately)
<b>CDH-R12</b>	<b>Counterweight displacement kit</b> , mounts to 12 and 16 lb. guide rails (order cable [CDH-L500, CDH-L1000 or CDH-L1500] separately)
<b>CDH-L500</b>	<b>Cable</b> , 500' • 152 m length, 1/16" diameter, with thimbles and clips (use for up to 250' • 71 m of rise)
<b>CDH-L1000</b>	<b>Cable</b> , 1000' • 304 m length, 1/16" diameter, with thimbles and clips (use for up to 500' • 152 m of rise)
<b>CDH-L1500</b>	<b>Cable</b> , 1500' • 456 m length, 1/16" diameter, with thimbles and clips (use for up to 750' • 223 m of rise)
<b>040219</b>	<b>Cable</b> , cut to length, does not include attachment hardware, please specify length
<b>79-103</b>	<b>Thimble</b> , for 1/16" cable attachment
<b>79-104</b>	<b>Crosby clip</b> , for 1/16" cable attachment
<b>36-178</b>	<b>Wire cutters</b> , for cutting steel cable

The **Counterweight Displacement Kit** is an easily installed "ring on a string" hardware kit that, when used in conjunction with a relay circuit (not included), can signal the controller if a counterweight has been displaced due to a seismic event.

Two steel cables run parallel to the counterweight guide rails and pass through a pair of eyebolts located on the counterweight. If an eyebolt contacts a cable (which indicates a counterweight displacement), the circuit is completed and the controller stops and redirects the car immediately.

### Certifications

**ISO 9001**  
 Draka EP's Rocky Mount facility was assessed and registered by Lloyd's Register Quality Assurance Limited for ISO 9001, EN ISO 9001 and ANSI/ASQC Q9001.

**UL Listed**  
 for cables approved for use in the US that meet all pertinent requirements of Underwriter's Laboratories.

**NEC Compliant**  
 for cables used within the US that meet all pertinent requirements of the 2002 National Electric Code.

**CSA Certified**  
 for cables approved for use in Canada that meet all pertinent requirements of the Canadian Standards Association.

**Pennsylvania Bureau of Deep Mine Safety**  
 approved for cables used in commercial mines.

**US Dept. of Labor Mine Safety**  
 approved for cables used in commercial mines.

# Internal Components

## for Draka EP Finished Cables

### Raw Materials

#### Electrical Components for Traveling and Hoistway Cables

##### Stranded Conductors

Bunch-stranded bare soft drawn copper. AWG sizes comply with ANSI/ASTM B174, ANSI/ASTM B3 and with Type ETT requirements of UL 62 and CSA C22.2 No. 49.

##### Insulation

60° C, colored, flame-retardant polyvinyl chloride complying with ETT requirements of UL 62 and CSA C22.2 No. 49.

##### Identification

Each insulated conductor and shielded pair is positively identified by an insulation color or a combination of insulation color and numerical markings appearing four times/foot • thirteen times/meter.

#### Mechanical Components for Traveling and Hoistway Cables

##### Steel Support for Round Traveling Cables

Preformed, flexible, low torsion, zinc-coated, steel wire rope in accordance with applicable portions of Military Specification MIL-W-83420. The steel support is insulated with 60° C flame-retardant polyvinyl chloride (Super-Flex® cables have the steel covered with a rayon or cotton braid). Complies with ANSI/ASTM, UL and CSA requirements.

##### Steel Support for Flat Traveling Cables

Preformed, flexible, low torsion, zinc-coated, steel wire rope in accordance with applicable portions of Military Specification MIL-W-83420. Complies with ANSI/ASTM, UL and CSA requirements.

NOTE: The National Electrical Code (NEC) requires steel support for traveling cables with hanging lengths of over 200 feet/61 meters.

##### Jute Filler

All fillers are electrical-grade dry jute. Fillers are an aid in producing a torsionally-balanced cable. Individual core interstice fillers distribute interlayer pressure and reduce conductor friction.

##### Binder

Helically-wound synthetic fiber provides maximum strength.

##### Braid

A rayon or cotton braid is applied over the core assembly with 95% coverage.

##### Jacket

The outer jacket is black, 60° C polyvinyl chloride specifically compounded for flexibility and abrasion resistance. The finished cable meets either the UL VW-1 or UL-1581 and CSA FT1 flame requirements. It also complies with ANSI/ASTM, UL and CSA requirements as needed. Operating temperatures range from +5 °F • -15 °C to +140 °F • +60 °C.

Optional rugged polyurethane (PUR) jackets are available upon request. Operating temperatures for PUR cables range from -4 °F • -20 °C to +140 °F • +60 °C.

Certain cables are available with halogen-free jackets and insulation. See page 67 for round halogen-free cable. Halogen-free flat traveling cable is also available.

#### Communication Components for Traveling and Hoistway Cables

##### Shielded Pairs

20 AWG • 0.5 mm<sup>2</sup>, or 18 AWG • 0.75 mm<sup>2</sup> insulated conductors, paired together with a short lay twist, shielded with 36 AWG bare copper braid for 85% coverage. They are jacketed with colored, flame-retardant 60° C polyvinyl chloride and comply with ANSI/ASTM, UL and CSA requirements.

##### RG11/U Coaxial Cable

Excellent for CCTV applications. 75 ohm, UL listed. Center conductor is 16 AWG • 1.5 mm<sup>2</sup> soft drawn stranded copper insulated with cellular polyethylene, braided with bare copper for 97% coverage and jacketed with flame-retardant PVC.  
Attenuation:  
0.66 dB/100' • 2.16 dB/100m @ 10 MHz  
1.30 dB/100' • 4.26 dB/100m @ 50 MHz  
Capacitance: 17.3 pf/ft • 56.7 pf/m

##### RG6/U Coaxial Cable

Good for CCTV applications. 75 ohm, UL listed, CSA certified. Center conductor is 20 AWG • 0.5 mm<sup>2</sup> stranded copper insulated with cellular polyethylene, wrapped with aluminum tape (100% coverage), braided with tinned copper (60% coverage) and jacketed with flame-retardant PVC.  
Attenuation:  
0.65 dB/100' • 2.13 dB/100m @ 10 MHz  
1.55 dB/100' • 5.08 dB/100m @ 50 MHz  
Capacitance: 17.3 pf/ft • 56.7 pf/m

##### Fiber Optic Subunit

62.5/125 micron tight-buffered multimode optical fiber, covered with high-strength aramid yarn and jacketed with flame-retardant polyvinyl chloride.  
Max. attenuation @ 850 nm: 3.75 dB/km  
Max. attenuation @ 1300 nm: 1.5 dB/km  
Min. bandwidth @ 850 nm: 160 MHz•km  
Min. bandwidth @ 1300 nm: 500 MHz•km

#### Whisper-Flex® and Steadi-Flex® Components

##### Chain

Low carbon, electrically-welded proof coil chain. Each link is proof-tested at two times the working load limit.

##### Filler

Metallic bead/polyvinyl chloride mixture adds mass and forms a round cross-section.

##### Jacket

60°C flame-retardant polyvinyl chloride that resists oxidation, weathering, solvents, chemicals and flame.

**Steel Central Support**  
 Preformed, flexible, low torsion, zinc-coated, steel wire rope meeting Military Specification MIL-W-83420, insulated with 60° C flame-retardant PVC and covered with a rayon or cotton braid.

**Stranded Conductors**  
 Bunch-stranded bare soft drawn copper, insulated with 60° C colored, flame-retardant PVC complying with ANSI/ASTM, UL and CSA requirements and codes, identified by insulation color or a combination of insulation color and numerical markings appearing four times per foot.

**Shielded Pairs**  
 Composed of insulated conductors, braided with 36 AWG bare copper for 85% coverage, and jacketed with 60° C colored, flame-retardant PVC.

**Coax Cables**  
 RG6/U style with 20 AWG stranded copper conductor and cellular polyethylene dielectric. Shield is tinned copper braid and overall aluminum foil. Jacket is flame-retardant PVC.

**Jute Filler**  
 Electrical-grade dry jute distributes interlayer pressure and reduces conductor friction.

**Binder**  
 Strong, helically-wound synthetic fiber.

**Braid**  
 A rayon or cotton braid is applied with 95% coverage.

**Jacket**  
 60° C PVC specifically compounded for flexibility and abrasion resistance. UL VW-1 and CSA FT1 flame rated through-out. Polyurethane (PUR) jackets are available upon request.

The Universal Hanging System is based around our patented Steel-Core Hanging Device which is designed to solidly grip and support the steel wire support member. It also safely secures the cable to the welded steel bracket thus preventing rotation.

The Universal Hanging System is a safe and effective unit that saves time and labor. It also has the added benefit of not having to bend (and possibly compromise) the steel support as required in other termination methods.

The Universal Hanging System is available in one and two cable configurations and comes as a kit with all installation hardware. Order two kits per cable, one for the car and one for the hoistway.

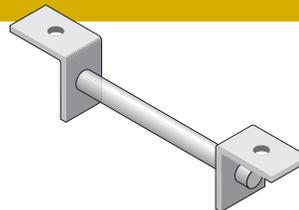

\*NOTE: Replacement strand vices are for use ONLY in Universal Hanging Systems.

Whisper-Flex cable provides smooth operation at temperatures of -15° C to +60° C and, in the US, can be used for elevators with rated speeds of no greater than 700 ft/min • 3.56 m/sec.\*

Support brackets, U-bolts, S-hooks, and heavy duty stainless steel grips specifically designed for Whisper-Flex cable must be used to ensure safe installations. See pages 79 and 80 for details on this hardware.

Draka EP dampening devices are recommended to minimize cable sway for car speeds above 350 ft/min (1.8 m/sec). See pages 81-83 for information on these devices.

This diagram shows the approximate placement of components for a Whisper-Flex cable installation. Refer to the Compensating Cable Installation Guide for exact instructions on installation procedures.

**Draka EP can help you determine which size of Whisper-Flex cable to use. Call 1-877-372-5237 or +1-252-984-5100 and have the following information ready:**

- 1) number of hoist ropes per car
- 2) outer diameter of the hoist ropes
- 3) stranding of the hoist ropes (i.e. 8 x 19, 8 x 25...)
- 4) car roping (i.e. 1:1, 2:1, other...)
- 5) number of Whisper-Flex cables per car
- 6) length of Whisper-Flex cable needed

Stedi-Flex cables are available with 4 week lead time.

\*NOTE: Loop diameter varies with application (ex. car speed, distance between support points)

Stedi-Flex cable is a wide-loop version of our popular Whisper-Flex cable designed for use on elevators with greater than 400 feet • 122 m of travel or with elevators that have a side counterweight. It provides smooth operation at temperatures of -15° C to +60° C and can be used for elevators with rated speeds of no greater than 700 ft/min • 3.56 m/sec.\*

Support brackets, U-bolts, S-hooks and heavy duty couplings specifically designed for Stedi-Flex cable must be used to ensure safe installations. Shallow pit installation hardware (JCC-XX-CHN) is recommended for use with Stedi-Flex. See page 79 for details on this hardware.

Draka's EP ShallowSwayless dampening device is recommended for use with Stedi-Flex to minimize cable sway for car speeds above 350 ft/min (1.8 m/sec). See pages 83 for information on this device.

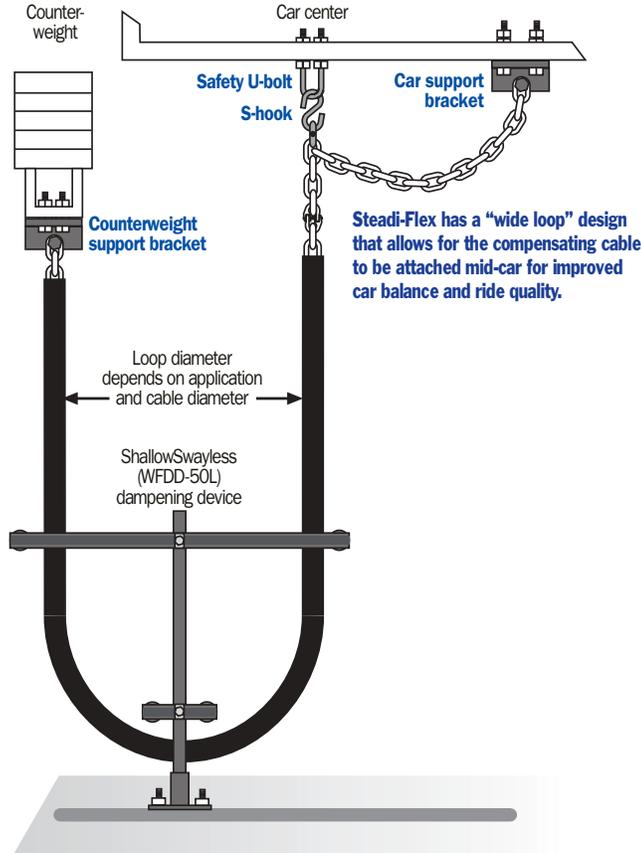

Refer to the JCC-XX-CHN sections of the Compensating Cable Installation Guide for exact instructions on installation procedures.

Draka EP can suggest which size of Stedi-Flex cable to use. Call 1-877-372-5237 or +1-252-984-5100 and have the following information ready:

- 1) number of hoist ropes per car
- 2) outer diameter of the hoist ropes
- 3) stranding of the hoist ropes (i.e. 8 x 19, 8 x 25...)
- 4) car roping (i.e. 1:1, 2:1, other...)
- 5) number of Stedi-Flex cables per car
- 6) length of Stedi-Flex cable needed

If replacing existing compensation, have ready the chain link size or cable brand name and outer diameter.

Swayless® for speeds up to 500 ft/min • 2.54 m/sec - US Patent Number 6,234,277

## Swayless® Dampening Device (two required per installation - mounting brackets sold separately)

WF-SRD-BR	brass ring replacement (2 ¾ • 70)		1

\*NOTE: Metric version uses metric nuts and bolts for closure and attachment.

**Draka EP Swayless dampening devices** are recommended for maintaining smooth operation of Whisper-Flex/Steady-Flex compensating cables for speeds of up to 500 feet/min • 2.54 m/sec.

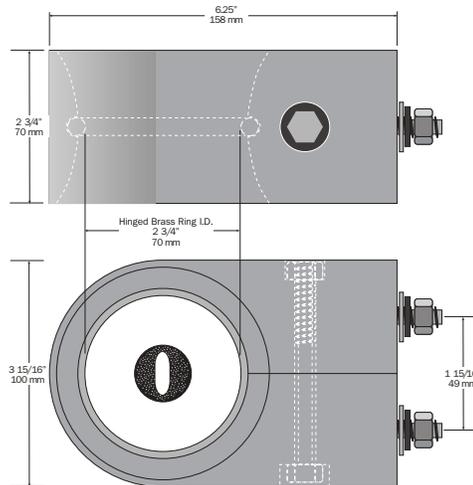

The purpose of the WF-SRD is to dampen any oscillation or cable sway that may be generated by cable motion at higher speeds. The dampening device is not usually required but can be used for speeds less than 350 feet/min • 1.78 m/sec. **Proper installation requires that compensating cable should not contact the ring of the dampening device when the cable is stationary. Cable must be centered within the holes.**

As the car and counterweight move, the dampening device keeps the Whisper-Flex compensating cable in position for optimum operation.

The WF-SRD can be used for compensating cable sizes WF10 and WF/SFC 15 to 30. Draka EP offers mounting brackets for easy installation in the elevator pit. Consult the Compensating Cable Installation Guide for the installation of dampening devices.

For shallow pits not allowing three feet height above cable loop, please call Draka EP for engineering assistance.

## Swayless® Mounting Brackets

Part Number	Description
SL-FMB-48	(2) floor-mounted brackets adjustable to 48" • 1.2 m height
SL-FMB-2	(2) floor-mounted brackets adjustable to 48" • 1.2 m height with (2) Swayless devices
SL-RMB-60	Counterweight rail-mounted bracket adjustable to 60" • 1.5 m width
SL-RMB-2	Counterweight rail-mounted bracket adjustable to 60" • 1.5 m width with (2) Swayless devices

These brackets are especially designed to help you to quickly and easily install Swayless devices off the counterweight guide rails and off the pit floor. They come with all the necessary hardware, including nuts and bolts.

ShallowSwayless® for speeds up to 700 ft/min • 3.56 m/sec - Patent Pending

## ShallowSwayless (one required per installation)

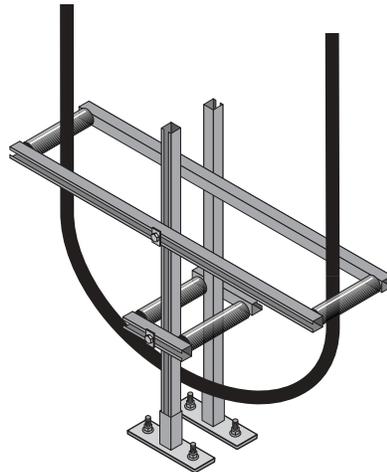

Part Number	Description
-------------	-------------

**WFDD-27L** ShallowSwayless kit, for Whisper-Flex cable with 23 to 27 inch loop

**WFDD-50L** ShallowSwayless kit, for Steadi-Flex cable with 38 to 50 inch loop

The **ShallowSwayless** is a sway reduction device for shallow pit applications where there is insufficient pit depth for Swayless or SuperSwayless devices. It reduces compensating cable sway and oscillation in installations up to 700 ft/min • 3.56 m/sec. Two sizes are available; the 27L version is for Whisper-Flex and the 50L version is for Steadi-Flex.

The kit includes all components shown, including mounting bolts and washers.

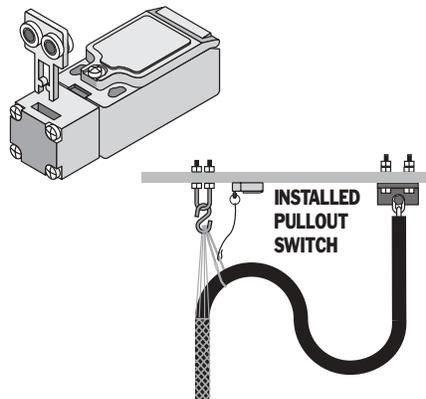

## Pullout Switch and Kit

### Component Specifications

**Stranded Conductors**  
 Bunch-stranded bare soft drawn copper, insulated with 60° C colored, flame-retardant PVC complying with ANSI/ASTM, UL and CSA requirements and codes, identified by insulation color or a combination of insulation color and numerical markings appearing four times per foot.

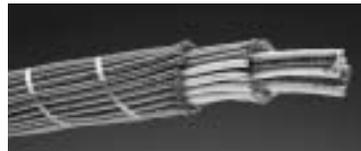

**Binder**  
 Strong, helically-wound synthetic fiber.

**Jacket**  
 60° C PVC specifically compounded for flexibility and abrasion resistance. UL VW-1 and CSA FT1 flame rated throughout.

#### Component Specifications

**Shielded Pairs**  
 Composed of 20 AWG stranded insulated conductors, shielded with polyester/aluminum tape for 100% coverage, insulated with 80°C semi-rigid PVC, positively identified by insulation color.

NOTE: 18-801-43 is shielded with 36 AWG bare copper braid for 85% coverage.

**Jacket**  
 Outer sheath is a chrome polyvinyl chloride (PVC) that provides a smooth, wear-resistant surface.

NOTE: 18-801-43 is jacketed with colored polyvinyl chloride (PVC).

**Drain Wire**  
 22 AWG bunch stranded soft drawn copper, tinned for solderability.

NOTE: 18-801-43 does NOT have a drain wire.

<b>06067</b>	6 / 18 AWG stranded copper • PVC insulation • unjacketed • 300V, 90°C	Control and signal
<b>TR-64</b>	7 / 18 AWG stranded copper • PVC insulation • unjacketed • 300V, 90°C	Control and signal
<b>9475</b>	RG6/U coax with a stranded copper conductor • PVC jacket	Data communications
<b>9259</b>	RG59/U coax with a stranded copper conductor • PVC jacket	Video, CCTV
<b>9244</b>	RG59/U coax with a solid copper conductor • PVC jacket	Video, CCTV
<b>9512</b>	2 pr / 22 AWG stranded tin/copper • PVC insulation • overall foil shield • PVC jacket • 300V, 105°C	Telephony
<b>9514</b>	4 pr / 22 AWG stranded tin/copper • PVC insulation • overall foil shield • PVC jacket • 300V, 105°C	Telephony
<b>1PR#18TW</b>	1 twisted pr / 18 AWG stranded copper • unjacketed	Telephony
<b>1PR#18SHDJK</b>	1 shielded twisted pr / 18 AWG stranded copper • PVC jacket	Data communications
<b>W#UL-2464</b>	2 shielded twisted pr / 18 AWG stranded copper • PVC jacket	Data communications
<b>9369</b>	3 shielded twisted pr / 18 AWG stranded copper • PVC jacket	Data communications
<b>9830</b>	3 pr / 24 AWG stranded tin/copper • PVC insulation • foil and braid shields • PVC jacket • 30V, 80°C	Data communications

### Selector Cable for 'Pie-plate' Type Selectors

Part Number	Description
<b>686-0010-22A</b>	10 / 22 AWG (16x34 AWG) stranded copper rubber insulation with cotton/rayon braid overlay jute core • black braided cotton jacket

### Instrumentation Cable PVC Insulation, 300V, NEC/CSA

Part Number	Conductors/Wire Size	Put-up
<b>IC-18-2</b>	<b>2/18 AWG</b> , stranded tinned copper conductors	1000'
<b>IC-18-4</b>	<b>4/18 AWG</b> , stranded tinned copper conductors	1000'
<b>IC-18-5</b>	<b>5/18 AWG</b> , stranded tinned copper conductors	1000'
<b>IC-18-7</b>	<b>7/18 AWG</b> , stranded tinned copper conductors	1000'
<b>IC-18-9</b>	<b>9/18 AWG</b> , stranded tinned copper conductors	1000'
<b>IC-18-12</b>	<b>12/18 AWG</b> , stranded tinned copper conductors	1000'

NOTE: 1000' minimum order required

### Thermostat Cable PVC Insulation, 150V, CL2

Part Number	Conductors/Wire Size	Put-up
<b>TC-18-2</b>	<b>2/18 AWG</b> , solid copper conductors	500'
<b>TC-18-4</b>	<b>4/18 AWG</b> , solid copper conductors	500'

## Connectorization

Draka Elevator Products' Connectorization Services can result in a faster, lower cost installation. Per your specifications, hoistway cables, traveling cables and wiring harnesses can be fitted with modular connectors that simply snap into place in the field.

Connectorization ensures that cables and harnesses are quickly, easily and accurately installed. Color-coded connectors assure positive circuit identification. All connectorized cable products are 100% post-fabrication tested for total customer satisfaction.

To order, call Draka Elevator Products Customer Service to get fax or mailing instructions. For best results, send an engineering drawing of the connectorized cable/harness and/or a sample of the harness. You will be given a quote and a lead-time, followed with a finished sample (upon request) for your inspection.

## Stripping Service 1 1/2 and 3 1/2 links exposed

Part Number	Description
-------------	-------------

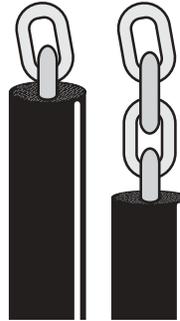

<b>WFSTRIP1.5L</b>	Cable with 1 1/2 links stripped at one end
--------------------	--

<b>WFSTRIP3L</b>	Cable with 3 1/2 links stripped at one end
------------------	--

Stripping (cable end preparation) of compensating cable means the removal of the PVC- steel composite from the chain core to ease installation in the field. Draka Elevator Products will free the required number of links at one end of cable leaving the other end "unprepped" for length adjustments.

Draka can translate its years of experience into faster, safer installation of compensating cable at the job site.

To order a stripped cable, ask for WF-STRIP for your lengths of compensating cable. Should an installation require the stripping of more links, please contact Draka Elevator Products' Customer Service and ask for Applications Engineering.

## Strip Kits for Whisper-Flex and Steadi-Flex cables

Part Number	Description
-------------	-------------

<b>WF-STRP</b>	Strip kit with instructions, gloves, hacksaw, nippers, jacket cutters, utility knife, angle bracket (already assembled) and clamps for all Whisper-Flex and Steadi-Flex cables.
----------------	---

Contains all of the specialty tools used for preparing the end of compensating cables. The only other tools required are a flat-head screwdriver and a 3/4" wrench.

**Call 1-877-372-5237 to get the Compensating Cable Installation Guide.**

## HOSS Systems

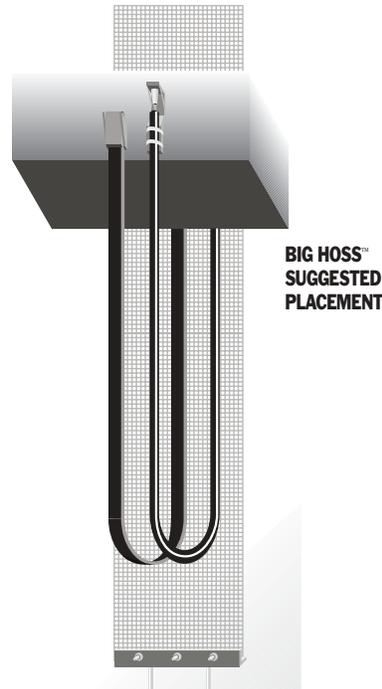

### BIG-HOSS™ Hoistway Obstruction Shield System

Part Number	Description
<b>BIG-HOSS</b>	Hardware Cloth Base Mounting Kit (100 feet • 30.48 m length)
<b>BIG-HOSS-75</b>	Hardware Cloth Base Mounting Kit (75 feet • 22.86 m length)
<b>BIG-HOSS-150</b>	Hardware Cloth Base Mounting Kit (150 feet • 45.72 m length)

The Hoistway Obstruction Shield Systems are used to prevent round and flat elevator traveling cable from repetitively striking obstructions in the hoistway and from crossing over into adjoining hoistways. Their use may help avoid possible interference and extend the life span of the installed elevator cables.

The BIG HOSS kit includes 100 ft • 30.48 m of the 1.5 ft • .46 m wide shielding material (1/2 inch • 13 mm mesh hardware cloth) and all the mounting hardware needed to attach the shield within the hoistway. All components are shipped in a single bag.

The LIL HOSS kit includes an additional 100 ft • 30.48 m of the shielding material and all the mounting hardware needed to attach the shield to the top of the BIG HOSS system and walls of the hoistway. Like the BIG HOSS, all LIL HOSS components are shipped in a single bag.

### LIL-HOSS™ Hoistway Obstruction Shield System Extensions

Part Number	Description
<b>LIL-HOSS</b>	Hardware Cloth Extension Mounting Kit (100 feet • 30.48 m length)
<b>LIL-HOSS-75</b>	Hardware Cloth Extension Mounting Kit (75 feet • 22.86 m length)
<b>LIL-HOSS-150</b>	Hardware Cloth Extension Mounting Kit (150 feet • 45.72 m length)

BIG-TOC and LIL-TOC (Top Of Car) safety rail kits install on top of freight and passenger traction elevators to create a safer and more secure car-top environment for both people and their tools. These permanent guardrail kits are easy to install and quickly adjust to the required size.

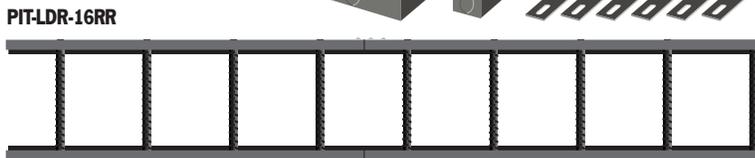

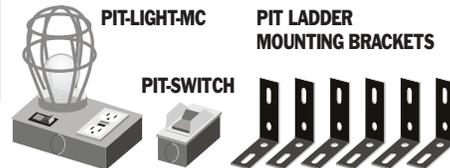

They are adaptable to both front-opening and front-and-rear opening car types. An optional debris net serves as an added measure to prevent the loss of tools and other important items.

All rails, bolts, nuts and hardware are included. The mesh debris shield is optional. The major siderail components come pre-assembled. Installation generally takes under an hour.

### **new** PIT-KIT and Pit Accessories

Part Number	Description
<b>PIT-KIT</b>	<b>PIT-KIT</b> , including all-steel, round-rung ladder extending to 9 feet (PIT-LDR-16RR), wall-mounted safety light with GFCI outlet (PIT-LIGHT-MC) and toggle stop switch (PIT-SWITCH). Electrical components are US/Canadian 110V. PIT-KIT complies with ASME A17.1-2004 Section 2.2 for pit equipment.
<b>PIT-LDR-16RR</b>	<b>Pit ladder</b> , 9' tall with 16" anti-skid round rungs
<b>PIT-LDR-12RR</b>	<b>Pit ladder</b> , 9' tall with 12" anti-skid round rungs
<b>PIT-LIGHT-MC</b>	<b>Pit light</b> , with metal cage, safety guard, GFCI outlet and switch
<b>PIT-LIGHT</b>	<b>Pit light</b> , with plastic cage, safety guard, GFCI outlet and switch
<b>PIT-SWITCH</b>	<b>Pit toggle stop switch</b>
<b>EN418-A</b>	<b>Pit locking stop switch</b> , with push-pull action, UL/CSA approved

The **PIT-KIT** now includes reversible ladder mounting brackets that permit the ladder to be mounted either 4 1/2" or 7" from the wall.

## Conduit Benders

Part Number	Description
36-002	Conduit bender, for 1/2" EMT, 4" inside bending radius
36-001	Conduit bender, for 3/4" EMT, 5" inside bending radius
36-000	Conduit bender, for 1" EMT, 6" inside bending radius
36-214	Conduit bender, for 1 1/4" EMT, 9" inside bending radius

Conduit benders have aluminum construction for easy handling. They have a precision-located degree scale, star, arrow and rim notch for perfect bends every time. Markings are raised and cast into bender body on both sides for easy visibility. Grooved internal hook surface helps prevent conduit from slipping. Flat hook surface provides stable starting point.

## Flexi-Peeler™ Round Stripper

## Sock Slicer™

Part Number	Description	Standard Packaging
<b>36-060</b>	For cable dia. 0.2 to 1.5 in • 4.5 to 40 mm	1
<b>36-060-M1</b>	For cable dia. 1.4 to 2.0 in • 35 to 50 mm	1
<b>36-061</b>	Replacement blade for both versions	1

The Flexi-Peeler precisely cuts a jacket with rotary, straight lengthwise and spiral cuts. Cut depth is adjustable.

The **36-060** has two quickly switched hooks that permit its use on cables from 0.2" • 4.5 mm to 1.5" • 40 mm in diameter.

The **36-060-M1** be used on cables with ODs from 1.4 to 2.0" • 35 to 50 mm. A replacement blade is included in the handle.

Part Number	Description	Standard Packaging
<b>36-177</b>	Sock Slicer braid cutter	1

The Sock Slicer braid cutter is specially designed for fast, easy braid removal. The protected blade cannot nick conductors and can be repositioned for optimum sharpness should it ever get dull.

## Super Peeler Round Cable Stripper

Part Number	Description	Standard Packaging
<b>36-146</b>	For cable dia. 0.75 to 1.25 in • 19 to 32 mm	1
<b>36-147</b>	For cable dia. 1.25 to 2.00 in • 32 to 51 mm	1
<b>36-148</b>	Replacement blade for both versions	1

Easy to calibrate and use, this unique cable 'peeler' allows you to precisely score round traveling cable jackets for fast removal without nicking the conductors underneath. The spring-loaded blade can be adjusted by turning the dial. Two sizes are available.

## FCJ Flat Cable Stripper

Part Number	Description	Standard Packaging
<b>36-135-M1</b>	Stripper	1
<b>36-138</b>	Replacement blades	6
<b>36-139-M1</b>	Replacement blade guide	1

Faster and safer than the utility knife it replaces, the FCJ stripper makes easy work of stripping jackets from flat cables. A rigid, ergonomic handle fits the worker's hand and protects it from cuts and skinned knuckles. The blade is housed in an L-shaped hardened steel guide that eases the stripping operation while keeping the blade and fingers from touching. Two extra blades are included in the handle.

## Flex Conduit Cutter

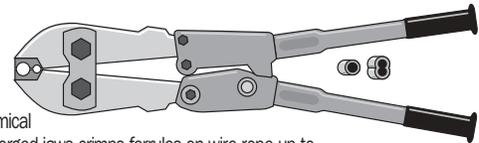

Part Number	Description
36-217	Flex conduit cutter, for 3/8, 1/2 and 5/8" flex conduit
36-218	Replacement blade, one

## Swaging Tool, Ferrules and Stops

Part Number	Description	Packaging
36-143	Swaging tool	1
36-145	3/32" • 2 mm ferrules and stops	2 ferrules/2 stops
36-144	1/8" • 3 mm ferrules and stops	2 ferrules/2 stops

This boltcutter-style swaging tool offers improved leverage and greater speed combined with economical durability. The strong forged jaws crimps ferrules on wire rope up to 1/8" diameter.

## Steel Core Cutters

Part Number	Standard Packaging
36-178	1

High-leverage cutters with Swiss-made carbide steel blades that make quick work of the steel reinforcement cable found in traveling cables. Plastic-coated handles for comfort and gripability. Blades lock in a closed position for better fit in a toolbelt.

## Crimping Tool

Part Number	Standard Packaging
36-097	1

Crimps bare or insulated terminals and splices for wire sizes 22-10 AWG. Plastic-coated handles for comfort and gripability.

## Wire Rope Measuring Tool

Part Number	Standard Packaging
WR-MT	1

Conveniently-sized tool for quick and accurate measurement of wire rope diameters. If the rope fits in the groove, retire the rope. Made of machined aluminum. Conforms to ANSI A17.1-B44 (2002)

## Whisper-Flex® and Steadi-Flex® Strip Kit

### Conduit Benders

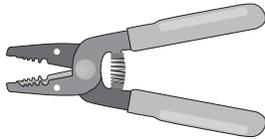

Part Number	Description
36-002	Conduit bender, for 1/2" EMT, 4" inside bending radius
36-001	Conduit bender, for 3/4" EMT, 5" inside bending radius
36-000	Conduit bender, for 1" EMT, 6" inside bending radius
36-214	Conduit bender, for 1 1/4" EMT, 9" inside bending radius

Conduit benders have aluminum construction for easy handling. They have a precision-located degree scale, star, arrow and rim notch for perfect bends every time. Markings are raised and cast into bender body on both sides for easy visibility. Grooved internal hook surface helps prevent conduit from slipping. Flat hook surface provides stable starting point.

### Wire Strippers

Part Number	Description
37-177	Wire stripper, for 26 to 16 AWG

### Sales Terms and Conditions

#### Terms

Full payment due within thirty (30) days of invoice date.

#### Conditions

As stipulated on our acknowledgments and invoices.

#### Freight and Insurance

F.O.B. origin.

### Warranty Conditions

All goods offered for sale by Draka Elevator Products, Inc. (hereinafter Draka EP) are offered for sale only on those terms and conditions appearing on the reverse side of Draka EP's Quotation Order Acknowledgment and/or Invoice forms. A SUMMARY OF THE MORE IMPORTANT PROVISIONS OF THESE TERMS AND CONDITIONS OF SALE IS REPRODUCED BELOW.

#### General

All sales and charges for goods or services sold by Draka EP shall be subject to the terms and conditions set forth on Draka EP Quotation, Order Acknowledgment and/or Invoice forms. Such terms and conditions shall be the sole and exclusive terms and conditions applicable to any sale. Draka EP will not be bound by any terms and conditions proposed by any buyer, which are additional to or different from the terms and conditions referred to above.

#### Prices

Unless otherwise agreed to in writing, a buyer shall pay to Draka EP its prices for the goods in effect on the date of shipment by Draka EP. All prices are F.O.B. origin apart from those exceptions set forth in Draka EP's Quotation, Order Acknowledgment or Invoice forms. The prices specified do not include sales, use, excise, or similar taxes.

#### Transportation and Routing

Draka EP shall have the sole control and discretion with respect to mode of transportation and routing.

#### Risk of Loss

The risk of loss of or damage to the goods shall pass to a buyer at the time Draka EP puts the goods in possession of a common carrier.

#### Force Majeure

Draka EP shall not be responsible or liable for any delay or failure to deliver any goods if such delay is deemed by statute or otherwise as force majeure.

#### Shipping Dates

All shipping dates are approximate only. No guarantee of any

shipping date is made unless such guarantee and its terms are specifically stated in writing.

#### Warranties

(a) Each of the following Draka EP products is warranted to be free from defects in material and workmanship for the life of its original installation, provided that it is installed in an application for which it is intended, as set forth in Draka EP's published installation procedures: SUPER-FLEX® traveling cable; WHISPER-FLEX® compensation cable; SUPERDUCT™ hoistway cable; and metallic wireway. (b) All other cable products manufactured by Draka are warranted to be free from defects in material and workmanship for a period of one (1) year, commencing on the date of shipment to buyer, under conditions of proper and normal recommended use. This includes, but is not limited to: Type ETP, Type EO, zero halogen, polyurethane and neoprene cables.

#### Terms and Conditions of Warranty

(a) DRAKA EP'S SOLE AND EXCLUSIVE OBLIGATIONS AND LIABILITIES UNDER ITS WARRANTIES ARE AND SHALL BE LIMITED TO ISSUANCE OF CREDIT FOR OR REPAIR OR REPLACEMENT OF ANY GOODS OR PARTS THEREOF WHICH ARE PROVED TO BE OTHER THAN AS WARRANTED, AND DRAKA EP SHALL HAVE SOLE DISCRETION AS TO WHICH OF THESE REMEDIES IT SHALL PROVIDE. DRAKA EP SHALL NOT REIMBURSE OR MAKE ANY ALLOWANCE TO BUYER FOR ANY LABOR CHARGES INCURRED BY BUYER FOR REPLACEMENT, ADJUSTMENT, OR REPAIR OF ANY GOODS OR PARTS THEREOF OR FOR ANY OTHER WORK UNLESS SUCH CHARGES ARE AUTHORIZED IN ADVANCE BY DRAKA EP. (b) If any of the goods on which Draka EP's warranties have not expired are claimed to be other than as warranted, Draka EP shall either examine the goods where they are located or, in its sole discretion, issue shipping instructions for return of the goods or any defective parts thereof, if any goods or parts thereof are returned to Draka EP, the Buyer shall prepay all transportation charges for such return. (c) Any claim for breach of Draka EP's warranties shall conclusively be deemed to be waived unless written notice of such claim is given to Draka EP within ten (10) days after the date on which the claimed defect is discovered. (d) Draka EP's warranties shall

be null and void if the original buyer for use transfers ownership of the warranted goods, unless Draka EP is notified in writing of the transfer and of the name and address of the new owner within fifteen (15) days after the date on which the transfer is made. (e) Draka EP's warranties shall not apply to any goods or parts thereof which have been subjected to any misuses, neglect or accidental damage, which contain defects in any way attributable to improper installation or to alterations or repairs made or performed by any person or entity not under the control of Draka EP or which are or have been used in any application for which they were not designed or intended. Further, Draka EP's warranties shall not apply to any goods or parts thereof which are obtained from manufacturers other than Draka EP and resold by Draka EP. (f) THE WARRANTIES SET FORTH HEREIN ARE DRAKA EP'S SOLE AND EXCLUSIVE WARRANTIES FOR OR RELATING TO THE GOODS. DRAKA EP NEITHER MAKES NOR ASSUMES ANY WARRANTY OF MERCHANTABILITY, ANY WARRANTY OF FITNESS FOR ANY PARTICULAR PURPOSE, ANY WARRANTY THAT THE GOODS SHALL BE DELIVERED FREE OF THE RIGHTFUL CLAIM OF ANY THIRD PERSON BY WAY OF INFRINGEMENT OR THE LIKE, OR ANY OTHER WARRANTY OF ANY KIND, EXPRESS, IMPLIED, OR STATUTORY. DRAKA EP NEITHER ASSUMES NOR AUTHORIZES ANY PERSON OR ENTITY TO ASSUME FOR IT ANY OTHER LIABILITY OR OBLIGATION IN CONNECTION WITH THE SALE OR USE OF THE GOODS, AND THERE ARE NO ORAL AGREEMENTS OR WARRANTIES COLLATERAL TO OR AFFECTING THE SALE OF THE GOODS. (g) DRAKA EP'S WARRANTIES, OBLIGATIONS AND LIABILITIES AND BUYER'S REMEDIES SET FORTH HEREIN ARE LIMITED TO THEIR PRECISE TERMS. DRAKA EP SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, FOR, RESULTING FROM OR IN CONNECTION WITH ANY BREACH OF WARRANTY. THE REMEDIES OF BUYER SET FORTH HEREIN SHALL BE THE BUYER'S SOLE AND EXCLUSIVE REMEDIES FOR, RESULTING FROM OR IN CONNECTION WITH DRAKA EP'S WARRANTIES OR ANY BREACH THEREOF.

#### Cancellation

Orders may be cancelled only with Draka EP's written consent.

**UV-5AT**

The UV-5AT hydraulic control valve is equipped with full temperature compensation over its entire operational range (80° to 150°F). Modifications to the valve body as well as improvements to its internal parts have drastically simplified UV-5AT down adjustments as well as making it the quietest valve on the market.

**UV-5ATC**

The UV-5ATC offers both temperature and pressure compensation, which is built into the redesigned down piston assembly. It maintains constant down speed between no load and full load conditions. No field adjustments are required.
