

I.S. Isolators (Modules) Transmitter Supply Unit Type 9103/2

- Intrinsically safe input [EEx ia] IIC
- Output 4 .. 20 mA
- 2 channels
- Galvanic isolation between input and output and also input and power supply (Outputs of channel 1 and 2 are galvanically connected)
- Power supply 18 .. 35 V DC
- Open-circuit and short-circuit monitoring
- Suitable for HART transmitters
- EMC tested, CE marking

Basic function: analog input, 4 .. 20 mA, 2 channels.

The transmitter supply units are used for intrinsically safe operation of 2-wire transmitters. They supply power to the transmitter and transmit the signal to the output. Also suitable for HART transmitters.
